DETAILED ACTION

Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-20 and 37-45, drawn to authentication and serial number validation.

Group II, claims 21-31, drawn to watermarking and XML.

Group III, claims 32-36 and 50-57, drawn to location tracking.

Group IV, claims 46-49, drawn to serial numbers with expiration dates.

4. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I has the special feature of a serial number validation algorithm. Group II has the special technical features of watermarking and XML. Group III has the special technical feature of location tracking via IP address. Group IV has the special technical feature of serial numbers with expiration dates. As the Groups do not share a special technical feature, restriction between the groups is proper.
5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

6. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
